APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source.

A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed Three & 2/10 cubic feet per second. (3.2)

Actual construction work shall begin on or before May 30, 1916.

Proof of commencement of work shall be filed before June 30, 1916.

Work must be prosecuted with reasonable diligence and be completed on or before November 30, 1916.

Application of water to beneficial use shall be made on or before May 30, 1922.

Proof of the application of water to beneficial use must be filed with State Engineer on or before June 30, 1922.

Proof of labor filed JUL - 5 1916

Proof of completion of work filed, DEC 12 1916

WITNESS MY HAND AND SEAL this 30th day

of December, 1915.

Cancelled Aug 8, 1919 on failure of applicant to comply with provisions of permit.

W. M. Kearney
State Engineer.

J. T. Scragham
State Engineer.

R I D E R

This latter application is really made as supplemental to Permit 2210. It has been found that the S $\frac{1}{2}$ of Sec. 10 can be more economically irrigated by making the diversion further up the creek than by taking the water from the reservoir as was contemplated under Permit No. 2210. The waters herein applied for are the waters which had already been granted under Permit No. 2210, and this application is made subject to that permit. There will be no protests for the other parties to Permit No. 2210 have parted with their interests therein.
